

would like to go over the functions of a camera.

The film speed (ISO)?

where to see the battery ...

I don't know what the difference between
Aperture and time priority is.

~~How to change shutter speed?~~

where are the little pictures called?

How to downloading pictures in bridge?

How to change Shutter Speed.

how to put flash on.

I don't know how to print the little
photos.

Not sure how to change shutter speed

go over some manual settings

still need to practise printing
images.

don't know what time aperture
is.

still confused on downloading pictures
in adobe bridge 😊

I don't know ~~at~~ what the F-stop means.

I get confused about everything... "

- I am still confused about what actually changes the aperture, like is it the f-stop?
- What is the f-stop and what does it do?

- With the sheets (M, M, TV), do we print out little thumbnails and ~~have~~ put them in the boxes or is there something else that's meant to go in the boxes or are we meant to leave them blank?
- How do we mass delete photos on our camera without deleting all of them?

I don't know how to use the time priority, and I don't know what it is.

changing aperture and time priority

I know how to focus on different focal points when taking a photo, but sometimes it doesn't work the way I do it. So what ~~is~~ is the real / actual way of doing this.
